AND LIFE SCIENCE

Gandus history goes back to 1885, when a distinguished gentleman named Prospero Gandus founds his company in Milan, specialized in the production of paper bags to contain the needles for the sewing machines.

Today, Gandus Saldatrici is composed of several specialized Divisions, providing comprehensive packaging solutions combining a wide range of packaging systems to a wide and complete offer of flexible packaging materials, characterized by high quality and innovation always in line with evolving market realities.

AUTOMATIC PACKAGING DIVISION

With over 450 customized projects, we have now reached the third generation of machines, capable of ensuring the perfect solution for every individual automatic packaging requirement.

- Innovative solutions for automatic Bagging machines complete with layflat tubing materials.
- Wide range of vertical FFS packaging machines and dosing systems
- Made in Italy
- Highest quality standards, certified
- Maximum design flexibility with endless customization possibilities
- Utmost safety through most strict machine internal controls
- High reliability of electronics
- Prevalence of mechanical precision
- Simple, ergonomic, efficient operator interfaces
- Optimization of overall dimensions
- Service always available, also remotable
- Special Engineering with highly customized solutions to meet every individual, more specific need
- Wide selection of high-quality materials: layflat tubing, poly bags, vacuum bags

BAGS AND TUBES PACKAGING DIVISION

Wide and complete range of manual sealers, semi automatic sealers, rotary sealers designed for PE, PP, AL, laminated, tubes sealers for plastic tubes.

- Made in Italy
- High reliability with long-lasting machines
- Sealing results guaranteed over time and aesthetically refined
- Simple, ergonomic, efficient operator interfaces
- Wide range of accessories
- Marking devices to allow printing of dates, codes or production batches
- Service always available
- Wide selection of high-quality materials: layflat tubing, poly bags, vacuum bags

MEDICAL, PHARMA AND LIFE SCIENCE PACKAGING DIVISION.

Sealing quality is a key element in the Sterile Packaging Process. Gandus medical sealers wide range allows a top-tier seal, perfectly able to ensure a reliable barrier against microorganism.

- Made in Italy
- Wide and complete range of EN ISO 11607.2 Validatable heatsealers
- Control, monitor and traceability of critical sealing parameters to assure consistent sealing integrity and the repeatability of the process
- Seal tightness guarantee
- Safety through internal controls of the sealing machine
- Traceability of all sealing parameters via USB stick or external server
- Open to communication protocols
- Friendly and intuitive Digital or Touch Screen operator interfaces
- Services totally dedicated to the Validation Process
- Wide selection of high-quality flexible packaging materials
